

Can you dash up the daffodils and dodge the dragons to access Excess Treatment Cost Support?

Accessing Excess Treatment Costs in Wales

Finish	34 Greater benefits to patients and NHS Services	33 Increased funding to health organisations carrying out research	32 Number of studies reported to the Welsh Government	31 Funding received by NHS organisation	30 Invoices submitted
24 Study sites identified	25 ETC confirmation letter received	26 R&D Approval	27 Study starts	28 Participants recruited	29 CPMS database updated
23 Support & Delivery Centre respond within 10 days	22 Patient Information sheet submitted	21 Excess Treatment Costing template submitted	20 Protocol submitted	19 Application not signed	18 ETC Application submitted to Support & Delivery Centre
12 Excess Treatment Costs identified	13 Research Costs identified	14 Cost savings deducted from ETC application	15 Non-commercial grant awarded	16 Ethical permission given	17 Study registered on Research Directory
11 Will it cost more than standard practice?	10 Will the treatment continue after the study ends?	9 Are costs for patient care or treatment?	8 Costs not attributed correctly	7 Attribute study costs	6 Research is primary or secondary care
Start	1 Opportunity to improve standard care	2 Robust study idea	3 Find a non-commercial grant scheme	4 Write grant application	5 Consult NHS R&D department(s)

The Health and Care Research Wales Support and Delivery Centre manages Excess Treatment applications, with a central team reviewing and providing outcomes to researchers within 10 working days.

Managing the national budget through a centralised process provides support to researchers in a timely and responsive manner. It has resulted in a more convenient, streamlined and transparent process for researchers wanting to conduct interventional research studies in Wales.
